Subject: Final Remedial Design Work Plan
Albion-Sheridan Township Landfill, Albion, Michigan

Dear Ms. Evison:

Woodward-Clyde Consultants (WCC) has completed the revisions to the subject document for your review. Two copies are attached. Included as part of the Remedial Design Work Plan is the Quality Assurance Project Plan, the Pre-Design Field Sampling Plan and a "model" Health and Safety Plan to be used by the selected contractor to develop a site specific health and safety plan.

In general, all of the comments (with the exception of those that you had noted in your review of the comments) were addressed except for the following:

1. Abandonment of monitoring wells LF01, LF02, LF03, MW-West, MW-South and MW-East will be addressed in the RA Work Plan (EARTH TECH comment Page 3-3, Section 3.2, General).
2. Bailer vs. low-flow sampling technique differences will be compensated for by the methodology change to filtration of samples for metal analysis (EARTH TECH comment Page 4-6, Section 4.4.1 and 4.4.2).

If you have any questions regarding this document, do not hesitate to contact me at (313) 464-1800 or Bob Gibson (Minneapolis Office) at (612) 593-5650.

Sincerely,

Dean Stokwell/bc

John Seymour, P.E.
Project Coordinator
